TSB0913 Clutch Slave O'ring for 2013 CX65

The clutch slave o'ring used on the 2013 CX65 is of different material than in years prior because the system uses Dot 4 brake fluid instead of mineral oil.

The two different o'rings are identical in size and color but are not interchangeable in either application.

The part number for the DOT 4 compatible o'ring used in 2013 is ZCMUOR25.

If a person cannot determine if they have the o'ring ZCMUOR35 for 2010 – 2012 or the ZCMUOR25 for 2013, the only choice is to throw it away, order new ones and label them properly as either one in the wrong application will cause problems.
