TSB0108: Water Pump Impellers

September 18, 2007

Cobra has redesigned the water pump impeller for all models of Cobra Motorcycles and ATV. This change is noticeable by the addition of a steel insert in the center to limit compression.

Customers and dealers will still order the following parts for inventory and service replacement

Single speed 50's	ECKG0073
Manual transmission 65/70	ECDC0075

Under these part numbers, you will receive an impeller and steel compression limiter.
