TSB0216
50cc Clutch Baskets

Cobra is switching the ECMU0120 back to the standard clutch basket used from 2004 through 2014.

This will be standard equipment for all 2016 Cobra 50's produced for 2016 beginning in late August. As the previous version was used production prior, and is still stocked at dealers, both will be legal clutch baskets for Cobra 50 products.
