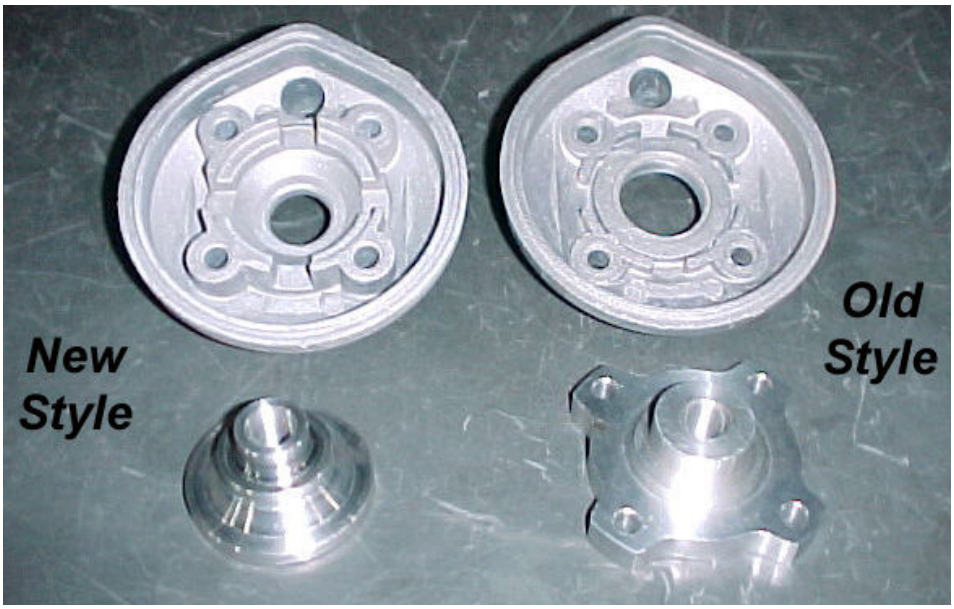
TSB0405: CM Cylinder Heads

February 10, 2005

As of Cobra CM model motorcycle serial number CM70905076, manufactured February 10, 2005, the CM will be assembled with the same style of cylinder head as the 2005 King. The two versions of cylinder head perform identically, and measure the same from the combustion chamber side but are assembled differently as the photo shows.



The two configurations require different top-end o-ring sets. The table on the following page will help sort and organize gasket kits for these and earlier models.
