TSB0809 Water Pump Impellers

November 18, 2008

Cobra has redesigned the water pump impeller for all models of Cobra Motorcycles and ATV. This change is noticeable by replacing the plastic impeller and steel insert with an aluminum impeller.

Customers and dealers will still order the following parts for inventory and service replacement

Single speed 50's	ECKG0073
Manual transmission 65/70	ECDC0075

Under these part numbers, you will receive an aluminum impeller.
