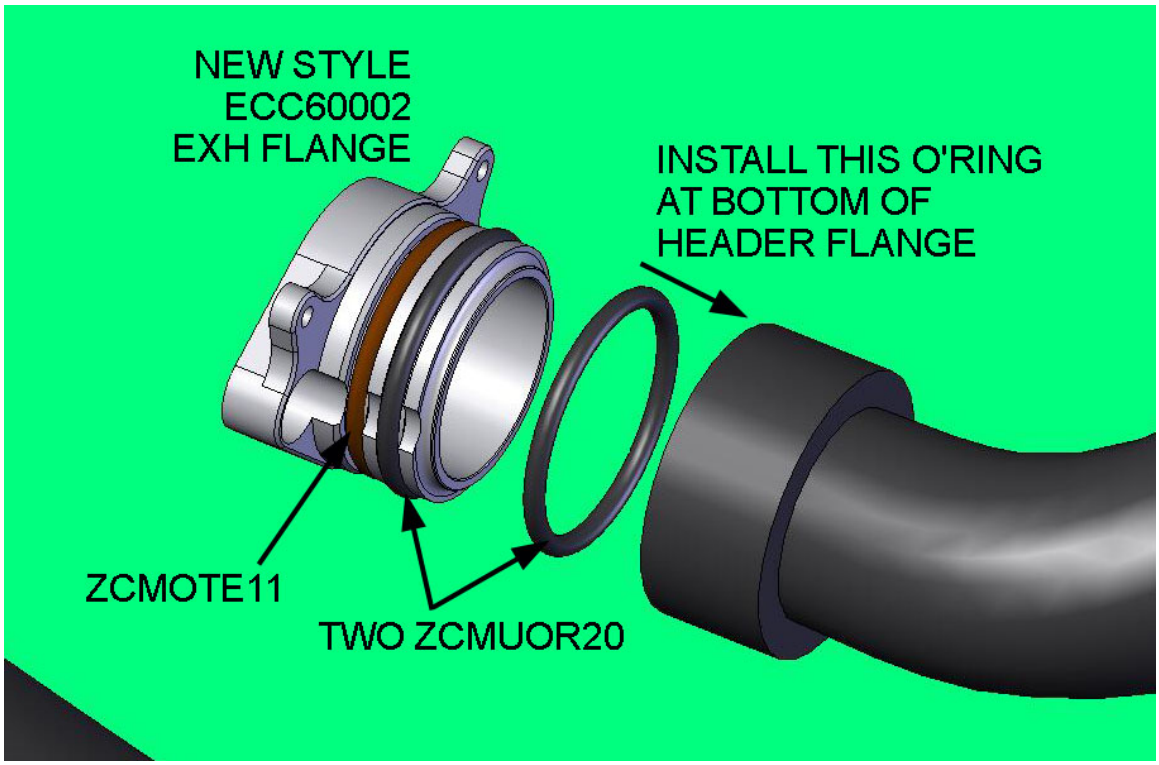
TSB1012 CX65 Exhaust Flange to Pipe Sealing

March 23, 2012

Effective immediately, Cobra CX65 will be shipping with exhaust flange to pipe sealing arrangements as shown below. This seals better and damps noise and vibration.

All service replacement flanges will be of this style for 2007 – 2012 CX65 also.


Please note that there are three o'rings now instead of two. They are not all the same. The o'ring closer to the cylinder is the same old ZCMOTE11 o'ring. The other two (the one mounting on the flange further from the cylinder and the one inserted in the pipe's header flange) are black in color and thicker (ZCMUOR20).
