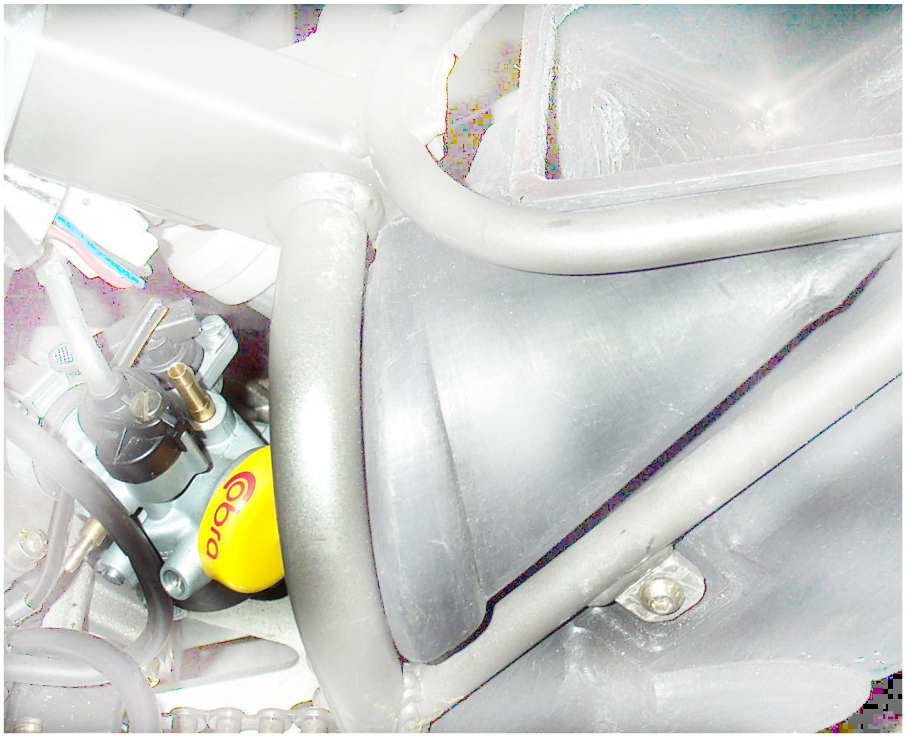
TSB1204: 2004 CM & PW carburetor inlet covers

April 2, 2004


The new design of the 2004 CM & PW allows the easy and rapid cleaning of the airbox with a hose by simply removing the air filter. This process can allow pressurized dirt and/or water to enter the carburetor unless the opening of the carburetor is properly covered. Cobra has a carburetor cover available that fits both the CM & PW model.
