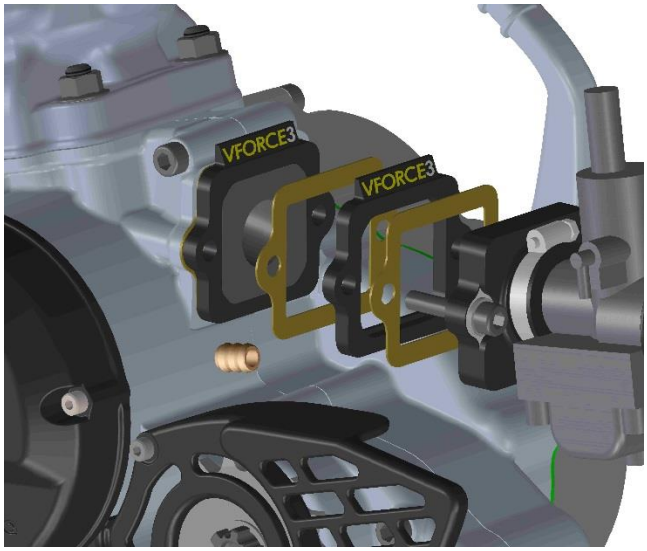
TSB1616 CX50 FWE Intake Spacer

June 29, 2016

From here on out, Cobra CX50SR FWE engines will be built with an intake spacer and gaskets between the reeds and the intake manifold. These spacers have shown a reduction in the bog experienced when landing from large jumps.

One spacer and two gaskets will be distributed to each dealer for each FWE bike that they sold. Dealers will hopefully contact the customers but it is the customer's responsibility to get them from the dealer. The customer will not be charged for them.

The gaskets and spacer are to be installed as shown.



Quantity	Part Number	Description
2	ZCCS0001	Intake Gasket
1	RCMU0038	Intake Spacer
