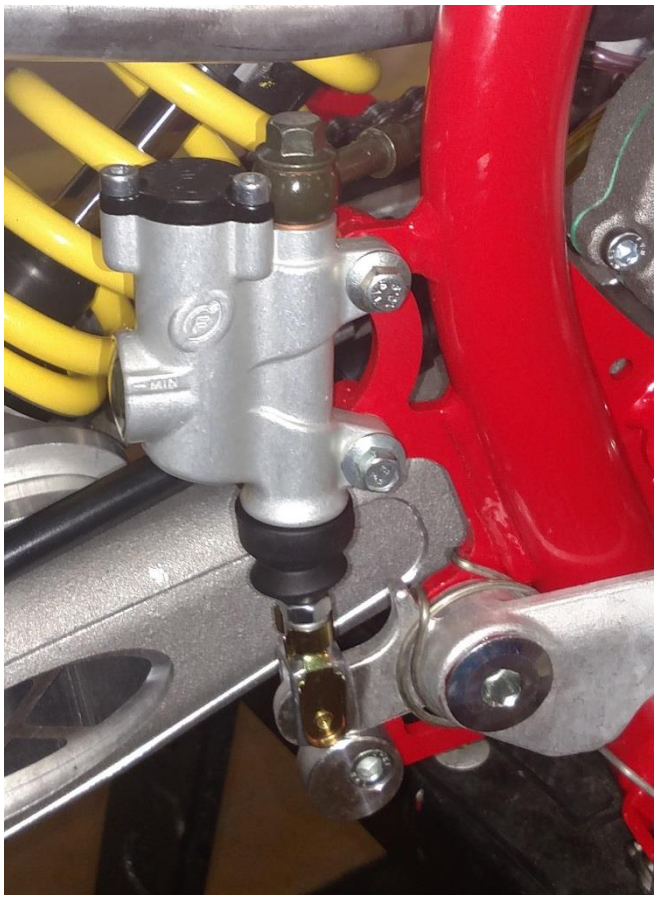
Rear Brake Master Cylinder 2017 CX65
TSB1017

Cobra CX65's are now being shipped with Formula rear brake master cylinders (BAC60015).

They are similar to the rear brake master cylinder used on the Cobra King, JR, and P3 in that it is produced by Formula and has a Ø11mm piston but different in that it connects to the brake line with an 8mm banjo bolt as opposed to the 50's that use a 6mm banjo bolt.


Both brake master cylinders use the same piston & seal rebuild kit BCKG0015.
