TSB0725 Transponder mounting on 2025 JR

⚠ WARNING

It appears that it's possible for a transponder, when mounted on the ***right*** fork leg, to rotate and impede the rider's ability to turn left.

Besides using two zip ties to affix the transponder mount to the fork leg, also apply two wraps of electrical tape, or similar, to keep the transponder assembly from rotating.

Confirm proper operation and turning before operating.

⚠ WARNING

Attempting to mount the transponder to the ***left*** fork leg will impede smooth throttle cable operation. Do not mount the transponder on the left fork leg.
