TSB0626 CX65 Clutch Master (Primary) Cylinder

The Magura clutch Master (Primary) cylinder (CCC60022) used on Cobra products from 2015 until current is no longer available.

From this time forward Cobra will be using a Formula master cylinder (CCMU0018).

CAUTION! The Formula master cylinder is ONLY compatible with DOT fluid, Specifically DOT 4.

The Magura hydraulic system was only compatible with Mineral Oil. Because the two systems are only compatible with different fluids, anyone switching from Magura to Formula MUST change the o'ring and piston in the slave (Secondary) cylinder. Also, due to fastening hardware, the hydraulic line will also have to be changed.

The table below summarizes the differences.

	Formula	Magura
Fluid	DOT 4	Mineral Oil
Master (Primary) cylinder	CCMU0018	CCC60022
Line	CCC60043M	CCC60040
Slave (Secondary) o'ring	ZCMUOR25	ZCMUOR35
Slave (Secondary) piston	CCC60042	CCC60005
Complete Kit (fluid not included)	CKC60009
